SKILLS

HTML, CSS, Javascript, Express, SQL, Postgres, EJS, Phaser, REACT, React-Native, Firebase, Mongoose, NoSQL, MongoDB, Python, Gatsby, Typescript, next.js, node.js, sequelize

RELEVANT EXPERIENCE

Microsoft, Bellevue — *Compression Engineer & Archivist*

April 2011 - May 2015

Trained new hires on compression and archive operations which included capturing new media sources from analog tape and film and encoding the digital masters for publication. My onboarding method became the template for which future hires were paced through.

Lululemon Athletica, Sumner — *Associate*

September 2017 - March 2020

I was responsible for the auditing of hardware of the warehouse's equipment. I also helped develop the daily and weekly reporting of those audits and created a new mail system for package storage for the managers, developers, and team leads.

EDUCATION

General Assembly, Seattle — Full-Stack Web Development Grad

March 2020 - June 2020

An intensive, twelve-week, 450+ hour software engineering immersive program teaching full-stack application development with object-oriented programming, MVC frameworks, and SQL and NoSQL database programs.

PROJECTS

Neighborhood Farmstand — May 2020 — Express *Webapp*

A website to trade locally grown veggies and produce. Search by postal code, neighborhood, or food type. Built in express and ejs.

Plan-Ahead — May 2020 — *Typescript & React Webapp*

A resource for teachers and students to schedule class related homework. Built in Typescript, React, MaterialUI, and Mongo.

Donut Dunker — June 2020 — *iOS Mobile App*

A mobile game where you score points by tapping the screen to dunk a donut. Buy more donuts in the shop tab. Built in React-Native and powered by Firebase.
